The 8 beMatrix principles

28

bePartners at your service

30

During a trade fair or an event, you obviously need a storage space where you can safely keep your stock and other (valuable) objects. The different types of doors in the beMatrix range allow you to lock your **storage space** or to create a **separate meeting space**.

The pivot door comes in a single, double or curved version, as well as two types of sliding doors. Whichever type you choose, they all offer the benefit of being supremely user-friendly, for the stand builder as well as the exhibitor.

Door frame

The beMatrix door frame perfectly allows you to create a **door opening** in your stand. The door frame's edge can be seamlessly finished with a panel, so it will blend perfectly with any kind of stand design.

STANDARD WIDTH: 992 MM

STANDARD HEIGHTS: 1984 / 2418 / 2480 / 2976 MM

FREE PASSAGE: 868 MM

ART. NR: 628 0992 +++++

The door frame is delivered by default with a D30 tube, so you can hang a curtain to cover the door opening.

01

Pivot doors

Single pivot door

The pivot door is based on the same DNA as the beMatrix frames and will be a great match with your modular stand. This pivot door has been designed to make the life of the stand builder more comfortable, from a technical as well as visual point of view. Thanks to the **rounded door profile**, the space between door and outer frame is very small. Connection holes are only provided where needed, so you end up with a sleek result.

STANDARD WIDTH: 992 MM
STANDARD HEIGHTS: 1984 / 2418 / 2480 / 2976 MM
FREE PASSAGE: 741 MM
ART. NR: 620 0992 +++++

Double pivot door

The double door offers the same benefits as the single door, but obviously opens up a **wider passageway**. The use of a roller lock and two moveable positioning pins allow all kinds of configurations: the doors can open on the right or left hand side, swivel inwards or outwards and when you remove the positioning pins, the door can even swivel both ways.

STANDARD WIDTH: 1984 MM
STANDARD HEIGHTS: 1984 / 2480 / 2976 MM
FREE PASSAGE: 1610 MM
ART. NR: 622 1984 +++++

To lock the door, latches are mounted on one of the inside doors, at the bottom and at the top

Curved pivot door

One of the biggest advantages of the beMatrix frame system of course will always remain its **modular character**, which in fact is true for all products in our portfolio. Hence why, apart from standard straight doors, beMatrix also offers curved pivot doors that can be seamlessly integrated in curved stands.

Left

Right

STANDARD HEIGHTS: 1984 / 2480 / 2976 MM

RADIUS: R1488 & R2976

FREE PASSAGE: 841 MM & 881 MM

ART. NR: 629 1488 +++++ & 629 2976 +++++

Accessories

Positioning pins

Thanks to the movable positioning pins, **all kinds of set-ups are possible**. The doors can open on the right or left hand side, swivel inwards or outwards and when you remove the positioning pins, the door can even swivel both ways.

Combination lock

Gone are the frantic searches for your keys, thanks to the combination lock. You can mount this lock **at the bottom** of the frame, or, in case of a single door, **at standard lock height**.

Roller lock

All pivot doors are equipped with a roller lock. The roller is pushed out using a spring. This spring mechanism **prevents the rattling** of a closed door.

Door handle

With the **flexible door handle**, you will gain time, since you do not need to fully mount or dismantle this kind of grip. In fact, the frames are perfectly stackable without having to remove the textile. In addition, clothing will no longer get stuck on a door handle. If you still want a fixed door handle, you can still opt for the metal version.

BREATHTAKING

BREATHTAKING

Sliding door Standard

Improve efficient use of your storage space thanks to a sliding door.

No more loss of space due to pivot doors, but still a separate and elegant space – for sure we can! The standard sliding door consists of a door frame that can **slide to the right or the left over a rail**. A great extra this sliding door offers is the fact the frame can be adjusted in height. That way, regardless of the surface the frame rests on, the door will always open and close with ease.

Left

Right

STANDARD WIDTH: 992 MM

STANDARD HEIGHTS: 1984 / 2418 / 2480 / 2976 MM

ART. NR: 635 0992 +++++

Rail

The rail of this standard sliding door consists of a standard sliding door rail and a steel connection plate. The rail is mounted on the door frame and on an adjacent standard frame.

Stop

Floor guide

Similar to a standard sliding door, a door guide system guarantees the hanging sliding door moves correctly.

Sliding door Pro

You want to go all the way? No problem at all! We also offer a range of Pro sliding doors. This Pro sliding door will slide into the reinforced frame and is completely **aligned with the stand wall**. Another advantage: no need to install this door separately, since this solution comes in one piece.

Left

Right

STANDARD WIDTH: 1984 MM

STANDARD HEIGHTS: 1984 / 2418 / 2480 / 2976 MM

ART. NR: 634 1984 ++++

Rail

The Pro sliding door range also comes with a standard sliding door rail, integrated in the frame construction.

Guide

With the Pro version, the frame slides in between two reinforced profiles.

Accessories

Combination lock

The sliding doors also come with a combination lock. This can be mounted **at the bottom** of the frame, or in case of Pro doors, **at standard lock height**.

Door handle

With the standard sliding door, you can choose from two types of **stainless steel door handles**.

The Pro sliding door comes with a stainless steel door handle developed especially for this door.

03 Add-ons

You would like to further customise the door of your stand to fit your needs or preferences? No worries!
The beMatrix standard door range can be complemented with several accessories, for example:

The 8 beMatrix principles

Quality guaranteed

All beMatrix frames are manufactured in-house, so we are in control of every step in the production process. Continuous optimisation and innovation initiatives ensure the system always complies with the market's demands.

Top finishing

The beMatrix stand building system comes with a large range of tools and accessories to finish your stand exactly the way you envisage it. With the infills, you can even hide the entire frame system so it becomes invisible to the eye. Thanks to our 'seamless' concept, not one seam will be noticeable.

Freedom to design

A beMatrix stand combines the benefits of a modular system with the possibilities of made-to-measure solutions. Almost any shape, contour and construction is conceivable and can easily be created. One single frame allows you to create all different kinds of stand concepts.

Lightweight

The aluminium frame system is lightweight, hence very ergonomic and eco-friendly: no need for the stand builder to carry around heavy structures, while the transport weight and CO2 emissions remain low.

Fast

Assembly and disassembly of the beMatrix system takes hardly any time. Its weight, simplicity and tool free assembly save loads of time, leaving you space to focus on the finishing details of your stand. Isn't that what makes you stand out most at a fair?

Long life cycle

The system is extremely sturdy, making it endlessly reusable. Wear and tear won't shorten its life cycle, since the frame is not visible to the eye once the entire stand is set up.

Ecologically sound

Because of its low weight, long life cycle and modular character, the beMatrix frame system is the eco-friendliest system today. Moreover, it is made out of untreated aluminium, so 100% recyclable and reusable without any quality losses.

International network

The bePartner network brings together real ambassadors of the beMatrix frame system, each with their own expertise: stand building, textile printing, LEDskin®, Double Deck... A creative cross-pollination offering you as our client nothing but benefits.

bePartners at your service

bePartner LEDskin®

Our LEDskin® bePartners all stock a minimum amount of LEDskin® and have years of expertise in the audiovisual industry. They are more than happy to help you perfectly integrate LEDskin® in your beMatrix stand.

bePartner printed textiles

Printing customised textiles takes real precision. Our bePartners for printed textiles have proven they totally master this specialised skill and guarantee perfect service, time and again.

bePartner build

Our bePartners build have a large stock of frames and accessories, integrate our latest innovations, are able to think outside the box and consider optimal service to be of paramount importance.

bePartner LEDskin® content

Do you already have LEDskin® available, but are you still looking for a partner to help you with content? Our content partners will advise and assist you, from content creation up to and including optimal display quality on your LEDskin® system.

bePartner printed panels

Printing infill panels for our beMatrix frames might seem simple, but this specialised job really has to be executed in a very precise way. Our bePartners for printed panels have already proven they totally master this specialised skill and guarantee excellent service, time and again.
