EASY & SUSTAINABLE EVENT BUILDING

BEMATRIX IS THE INVENTOR AND BELGIAN MANUFACTURER OF THE FRAME SYSTEM WITH BIG HOLES, LAUNCHED IN 1993.

Bematrix leverages the event industry towards positive transformation with a higher convenience and return for customers in a sustainable manner.

OUR MISSION IS TO BE THE LEADING SYSTEM FOR EASY AND SUSTAINABLE EVENT BUILDING!

The bematrix system offers event builders and exhibitors endless possibilities with endless kinds of concepts for exhibition stands, congress walls, expositions, indoor and outdoor events and pop-ups.

A SUSTAINABLE STEP FORWARD: FRAMES WITH ECO+ FINISH

Bematrix introduced **the ECO frame as an ecological alternative to the anodised frame.**

Anodising is a chemical surface treatment harmful to the environment. We invented a brushing technique with the same look as the end result, but without environmental risks.

MORE ON OUR EFFORTS TO MINIMISE OUR IMPACT ON THE ENVIRONMENT IN OUR SUSTAINABILITY REPORT

Scan the QR-code for impact

> ***"The bematrix system offers endless possibilities with endless kinds of concepts for exhibition stands, congress walls, expositions, indoor and outdoor events and pop-ups. You have one frame, but infinite possibilities."***

b62®

reddot award
winner

All dimensions of the b62® frame system have been **based on the perfect 62 × 62 mm matrix.** The width, length and height of the constructions are always multiples of 62.

The 62 mm matrix delivers **the ultimate modularity with countless configuration options.**

Why bematrix?

FAST & EASY BUILDING

Less sweat, more wow. Our **lightweight**, **tool-less system** lets builders set up faster, drink their coffee warmer and still deliver more projects in less time.

NO LIMITS TO CREATIVITY

Designers love bematrix because we say “yes” where others say “impossible.” **One grid, infinite possibilities** – from jaw-dropping brand stories to experiences that get people talking.

YOUR BUSINESS ACCELERATOR

Our frames don’t just build stands, they build companies. By investing in **long-lasting solutions**, entrepreneurs cut costs, scale smarter and grow without needing an army of extra hands.

BACKED BY A GLOBAL FAMILY OF INNOVATORS

Working with bematrix means joining **the original innovator** in modular frame systems – and a movement that’s always first with the next big thing. With 12 rental hubs, a global bePartner and beMaster network, and 300+ passionate beManiacs, you’re never alone. **Wherever you are, we’ve got your back.**

SUSTAINABILITY WITH A SMILE

We were **reusable** before it was cool. Our frames are designed to last, be reused again (and again), and eventually upcycled or recycled. **Good for the planet,** great for your karma.

BUILD FASTER, GROW SMARTER,
CREATE WITHOUT LIMITS, REUSE FOREVER!

– AND KNOW WE’VE GOT YOUR BACK, WHEREVER YOU GO.

Building curved sections made easy

No matter the intricacy of your ideas or design concept, with our **b62®** **curved frames range with 7 radii**, any project can come to life thanks to the endless possibilities when combined with standard frames.

Straight and curved frames are fully compatible because of the perfect 62 x 62 matrix and any infills will fit seamlessly.

PRODUCT PRINCIPLES

b62

1

The 62 mm grid assures a perfect fit in any direction. Create any shape imaginable.

Toolless

2

Hardly any tools needed. The fastest system to build.

System & custom

3

Unique merge of the modular system and custom elements.

ClimatePartner Certified frame

4

Calculate product carbon footprints, set reduction targets, implemented reduction measures and finance climate projects.

360°

5

Use the frame for walls, ceilings and floors. It harmoniously blends into one.

Welded frames

6

Lighter, stronger and faster assembly than standard frames.

Bematrify, our dna

7

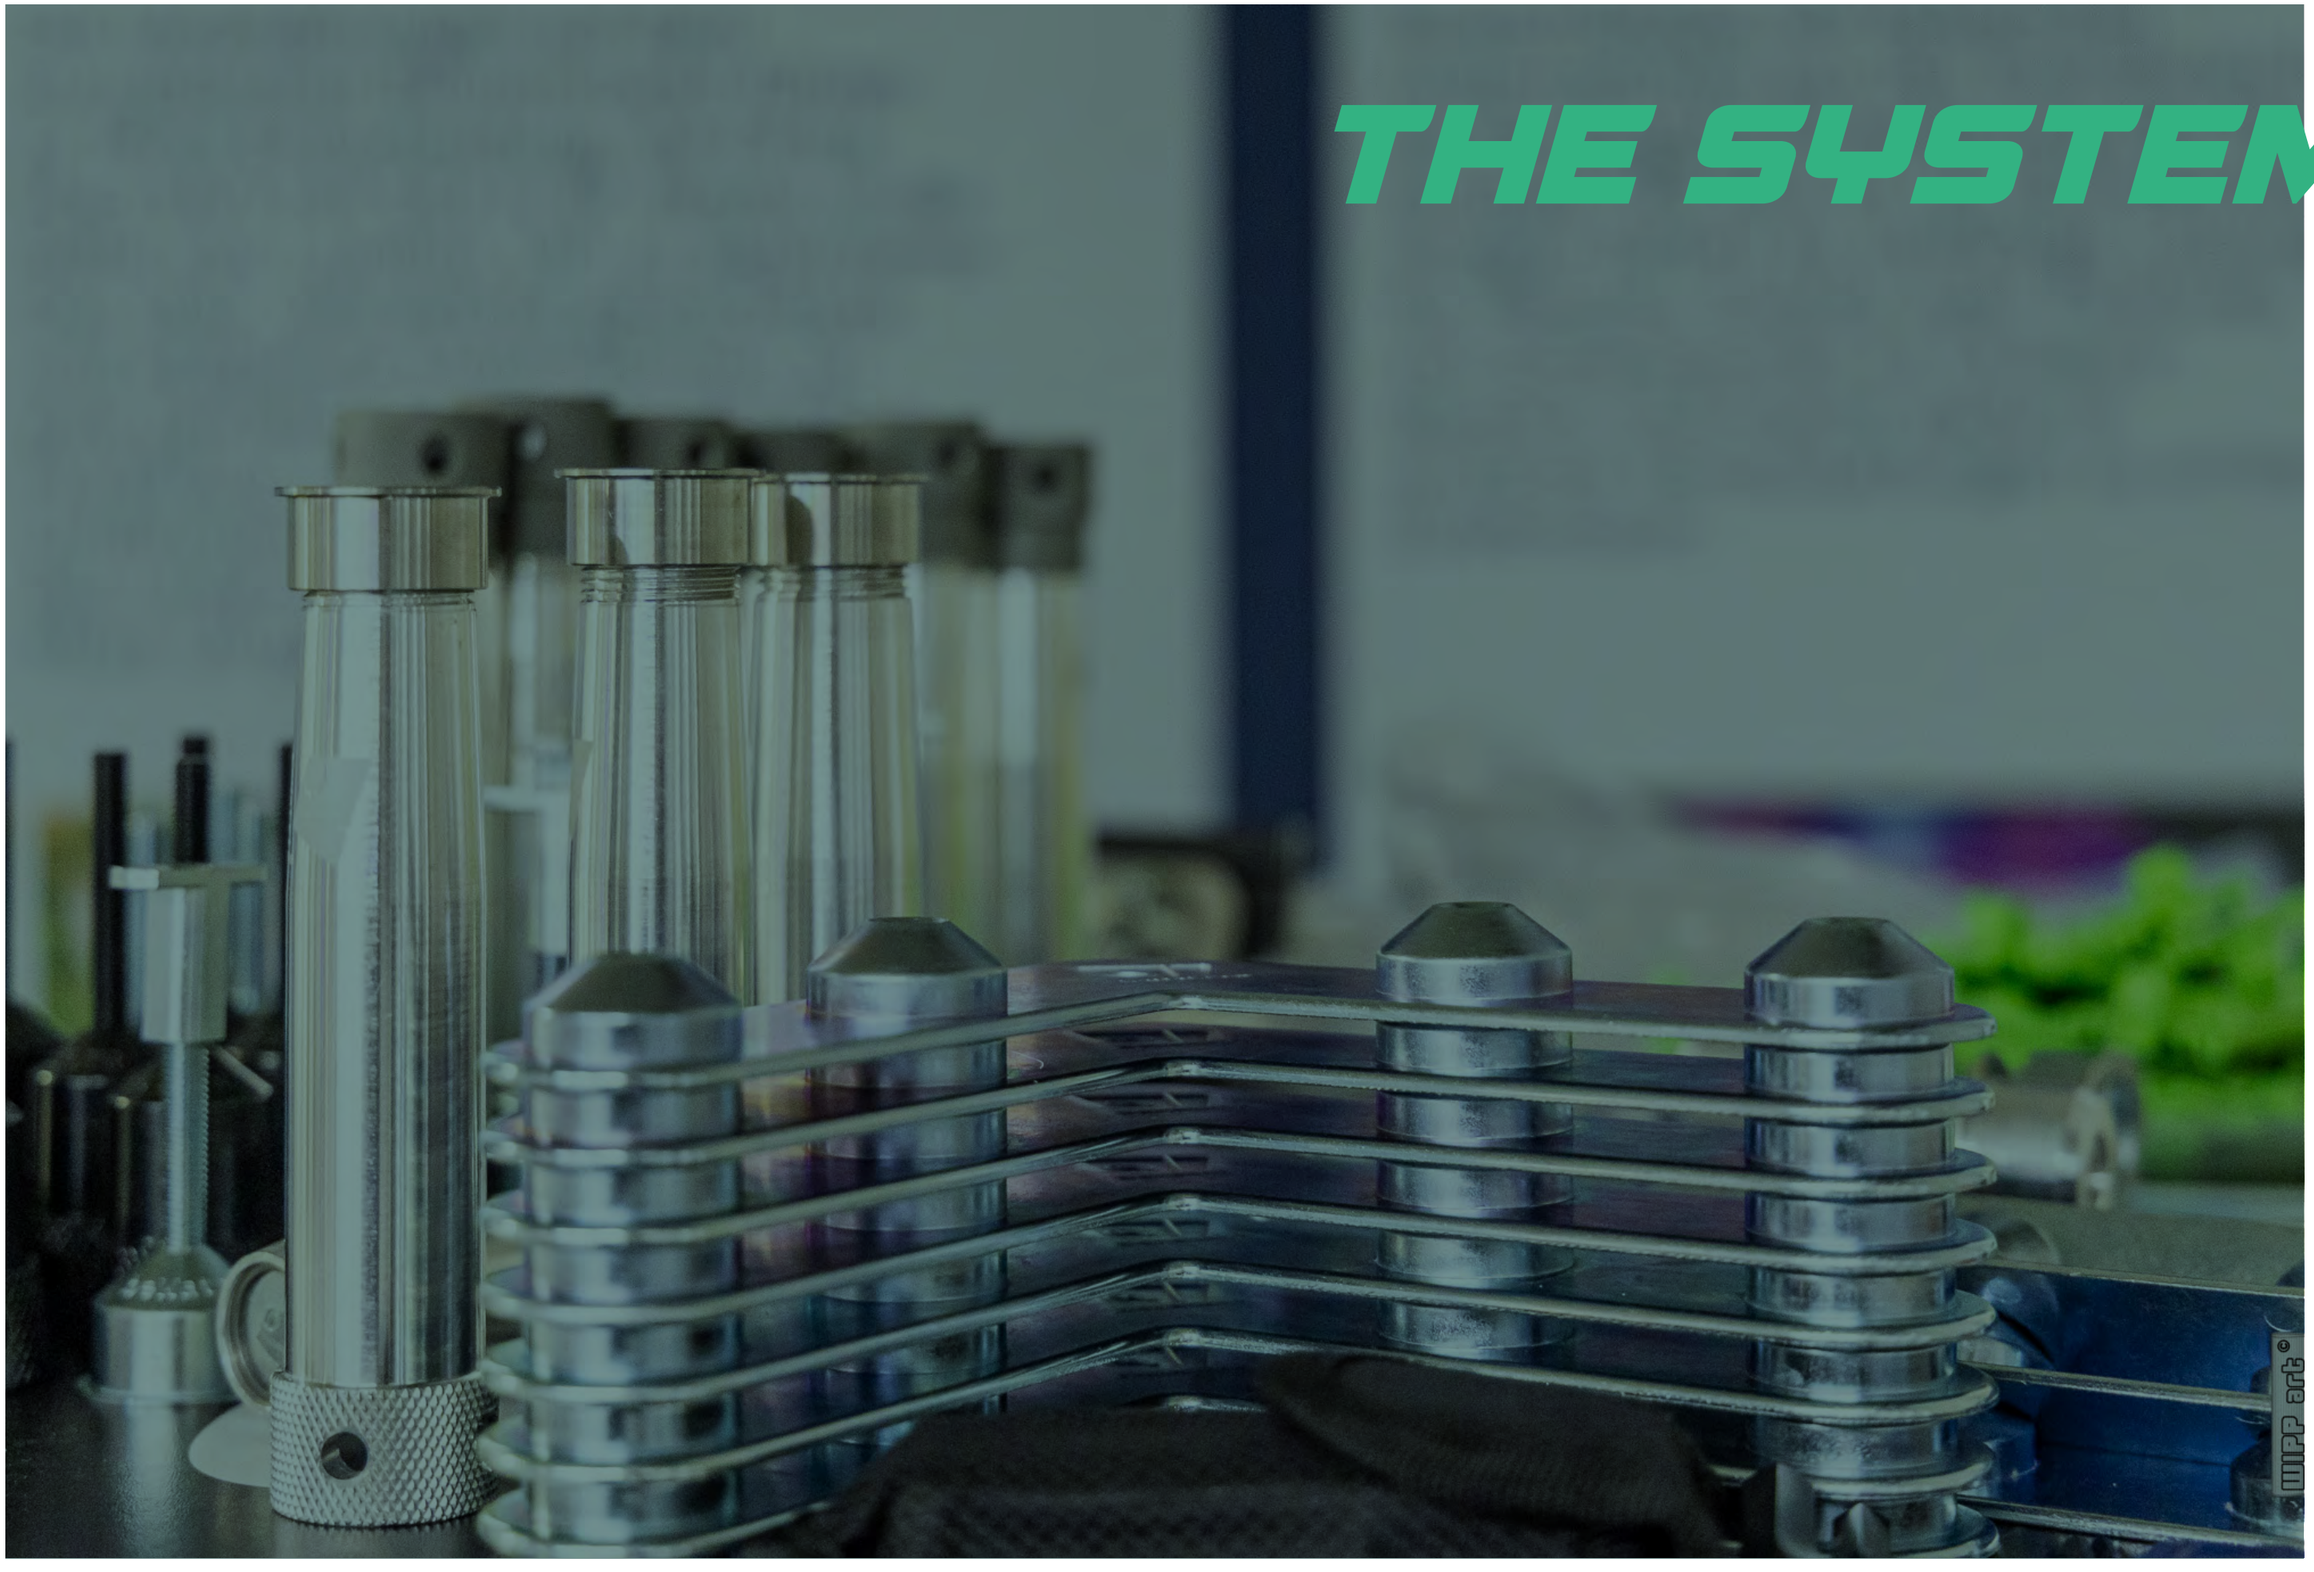
Easy to finish (panels/textile) and always connectable to the rest of the system.

Keep the body, change the skin

8

Endlessly reusable, just change the graphics!

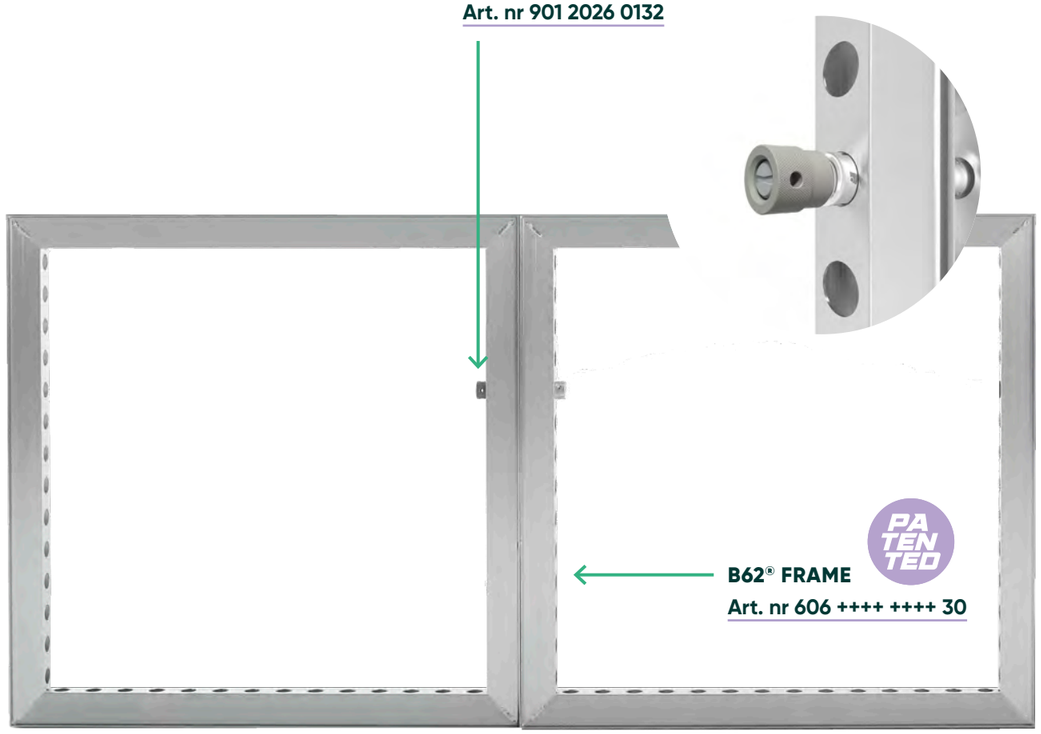
THE SYSTEM



Straight frames

It all starts with a wall

FAST CLAMP
Art. nr 901 2026 0132



B62® FRAME
Art. nr 606 ++++ ++++ 30

"The perfect 62 x 62 matrix.
Every construction is a perfect fit."

ECO PIN
Art. nr 901 28 0342 E

THE SAME LOOK WITH AN ECO TWIST

At bematrix, we aim at becoming carbon neutral by 2026. In every phase of the production process, we are taking steps forward to lower our carbon dioxide output. Our **ECO frame** proved to be a real game changer: we chose to no longer anodise frames, because this chemical treatment pollutes the environment and is in fact unnecessary when the frame is used indoors. The ECO+ finish results in the same finish level as the anodised frame. We use a brushing and polishing technique that approaches the look and benefits of anodisation, however, with zero impact on the environment.

Connect to create the wall

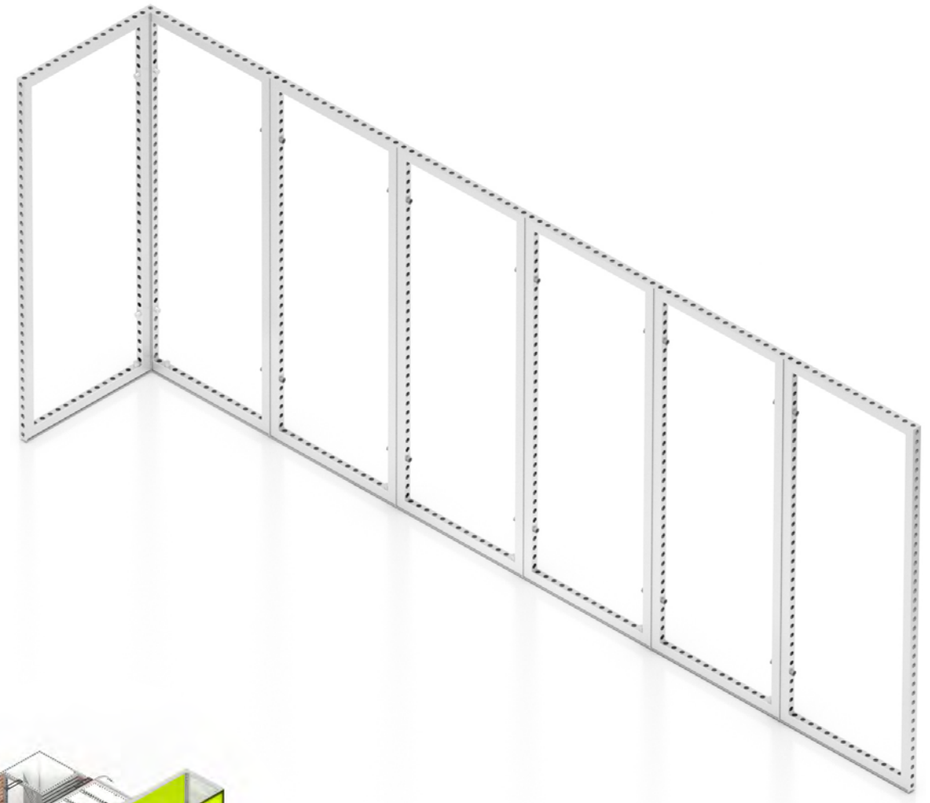
Our system is easy to use, so any mixed or complex connections are out of bounds. Quick mounting and a stable construction are guaranteed by our toolless connectors. One of the advantages is that assembly requires no tools.

FAST CLAMP

The Fast Clamp is the 7th of its generation. Fast Clamp allows an even faster, easier, stronger and more sustainable toolless connection between two aluminium frames.

The push button on one side activates an ingenious locking mechanism. No more screwing! This will help stand builders **reduce their assembling time by half** without giving in to strength. After pushing the product in place, the only thing that still needs to happen is a short finetuning adjustment. Another time saving feature is that the Fast Clamp can be left in its position - inside the frame - during transport and storage. The use of the Fast Clamp also simplifies stock management as it remains one piece. No individual parts can get lost or separated from each other.

STEP BY STEP



Finished stand design

- **Start with a straight back wall.**

Infills

Design your vibe with panels

While your stand's body (frames) can be reused over and over, you can **adjust the skin** (infills) to the specific needs during a certain fair or event. Panels in PVC, sandwich panels, wood, (acrylic) glass... anything goes.

Panels are attached to the frame with **VELCRO®**/Hook & Loop tape. VELCRO® hook is attached to the frame, VELCRO® loop to the panel.

TIP

Use the **T-REX,** a strong cutting tool to cut silicon edges at the aluminium flanges.
Art. nr 901 50 60 1X

Dress your stand with textiles

You want a clean look without any visible aluminium? If so, seamless textile is your best choice! The **silicon borders** of these textile infills are stretched over one or more frames' edges.

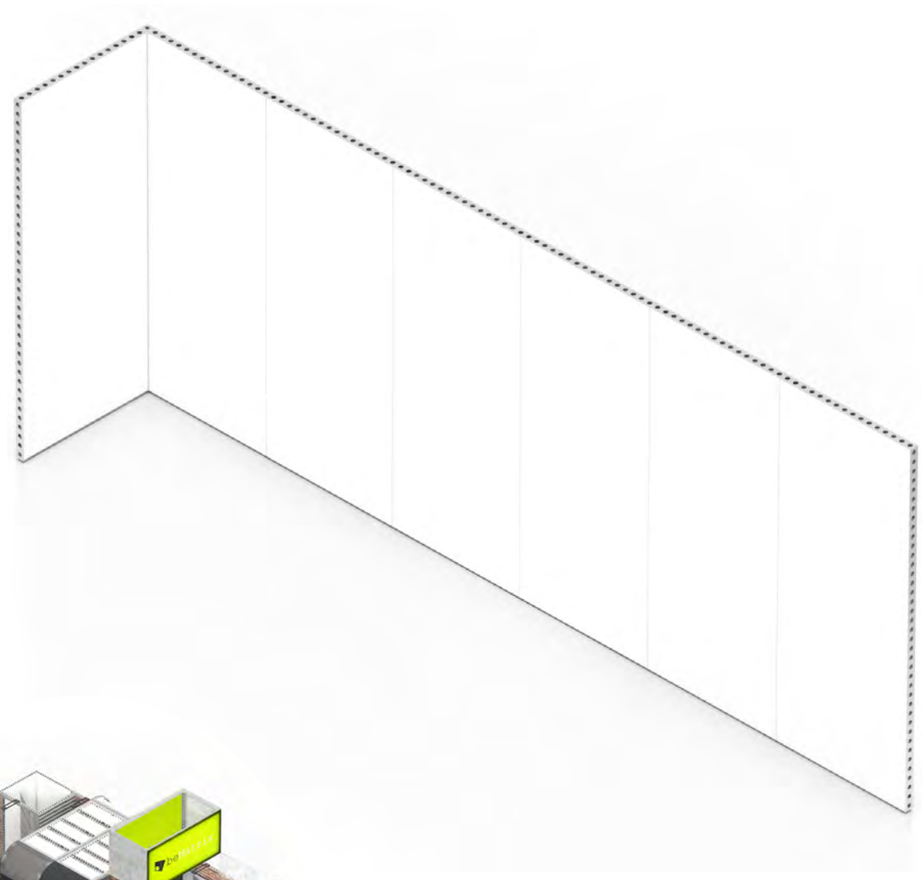
SLOTS TO MOUNT SILICON EDGE OF THE TEXTILE

© Total-e

TIP

Use the **Platypus**, the wide side makes it easy to remove panels and the narrow side helps you insrt textiles
Art. nr 901 50 70

STEP BY STEP



- Add the infills.

Doors

Enter new possibilities

During a trade fair or an event, you obviously need storage space to safely keep your stock and other (valuable) objects. The different types of doors in the bematrix range allow you to **lock your storage space** or to **create a separate meeting space**. Whichever type you choose, they all offer the benefit of being supremely user-friendly, for the stand builder as well as the exhibitor.

DOOR FRAME	Standard width	992 mm

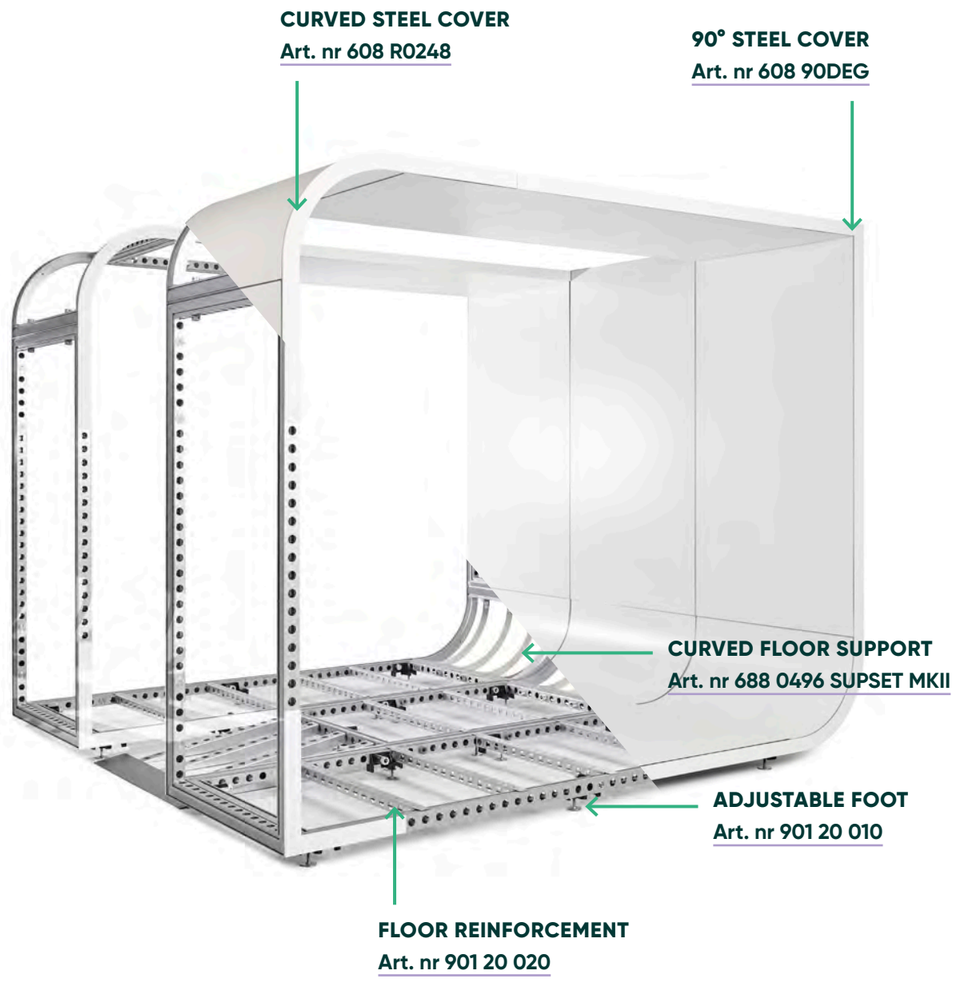
- Add curved frames.

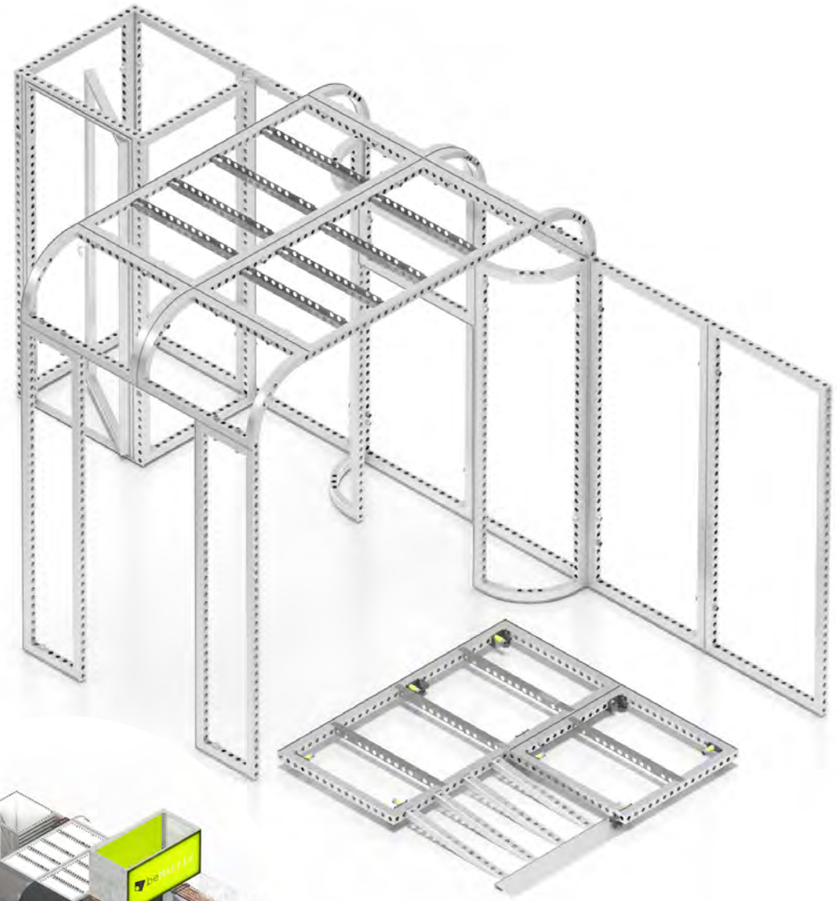
Frame versatility

Wall, ceiling, floor? **One frame, three applications**. Bematrix redefined the art of stand building with its **360° concept**. The strong, light and modular aluminium frames can be assembled into a unique harmoniously blend.



© Earl Brandspace

STEP BY STEP



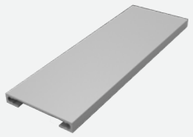
Finished stand design

- **Build the ceiling and the floor. All with one single system!**

Covers

Bematrix frames are handy and easy to assemble. On most occasions, stand holders want to camouflage the ‘body’ or frame, making the construction almost invisible. Next to the seamless textile concept, we also offer **covers that can hide the bematrix hole pattern**. The result? A smooth and sleek finish.

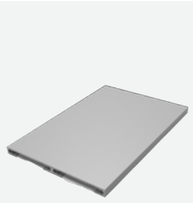
Hide the hole pattern



B62 COVER
Practical cover to clip on b62 frames.
Standard in RAL 9006 TEC but possible in any RAL colour.
Mount with Cover clip and finish with End piece.

Art. nr 608 ++++ D00 TG

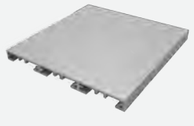
End piece:
Art. nr 608 11 01 TG



B124 COVER
Practical cover to clip on a 124 mm double wall or a 124 Lightbox. Standard in RAL 9006 TEC but possible in any RAL colour.
Mount with Cover clip and finish with End piece.

Art. nr
653 ++++ D00 9090 TG

End piece:
Art. nr 653 11 01



B186 COVER
Practical cover to clip on a 186 mm wall.
Standard in RAL 9006 TEC but possible in any RAL colour.
Mount with Cover clip and finish with End piece.

Art. nr
650 ++++ DO 9090 TG

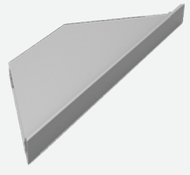
End piece:
Art. nr 650 11 02

COVERTAPE
Fast, cheaper and efficient alternative for the b62 cover. No glue residue on the frame.
Easy to cut during assembly.
Available in white, gray or black.
Peel off the backside and apply gently to the frame.

Art. nr 610 00 01

STEEL COVER (90° OR CURVED)
A sturdy steel cover to support your ‘up & over’ builds.
Indispensable for 360° constructions.
Standard powder coated in RAL 9006 TEC.
Fixed with Ø30 pins and M8 connectors.

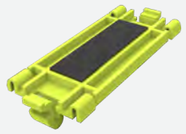
Art. nr 608 ++++ RAL



B62 PERFECT COVER WITH TEXTILE SLOT
Perfect cover that guarantees a perfect finish for wide fronts, ideal for finishing double walls and beTruss.
Standard powder coated in RAL 9006 TEC.
Mount with Cover clip and finish with End piece.

Art. nr 601 ++++ D00 TG

The parts behind the cover



COVER CLIP
Tool to attach covers to the frames. Simply attach the cover clip onto the holes, click the cover onto it and you're done. The rubber outer of the clip prevents the cover from moving.

Art. nr 901 00 030 MKII

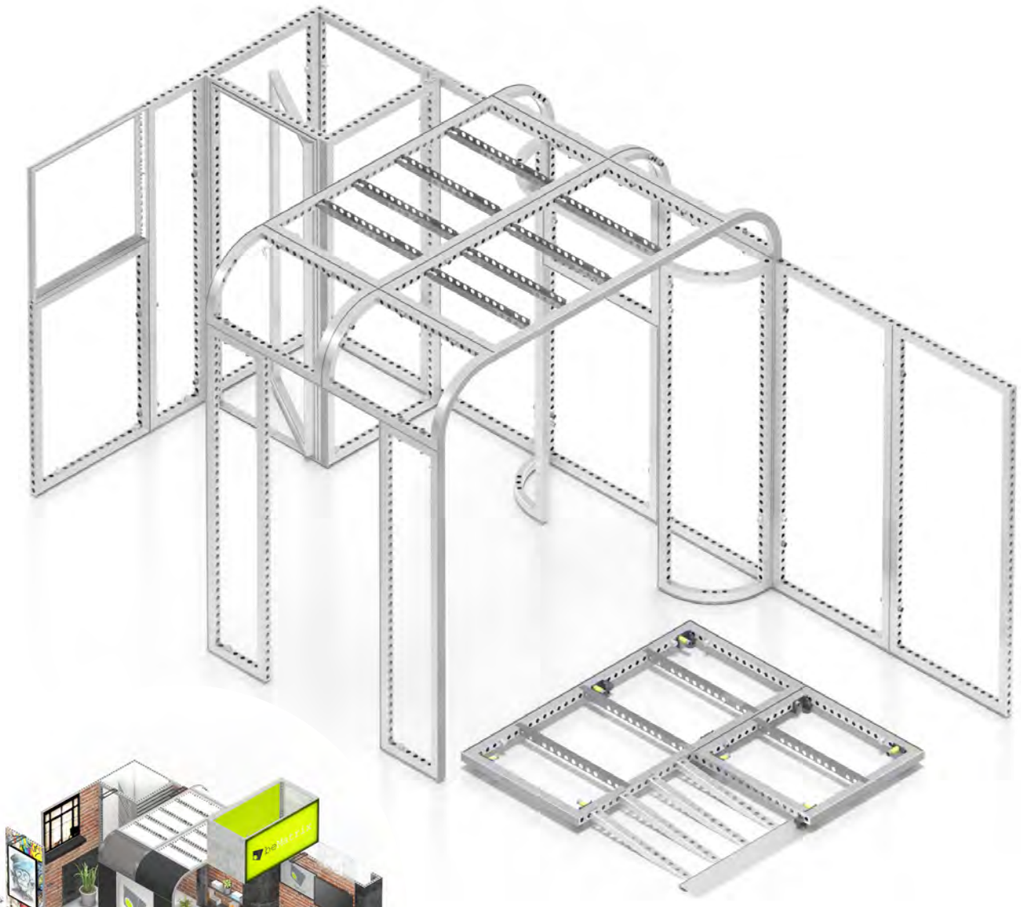
M8 PIN
M8 bolt to fix the frame on the pins.
Fast installation thanks to the long guide.

Art. nr 901 2048 0066 E

M8 COVER FIXATION
Sturdy, metal cover fixation to fix our aluminium cover profiles.

Art. nr 901 00 033

STEP BY STEP



Finished stand design

- **Add the covers to the frames.**
- **Add a Lightbox.**

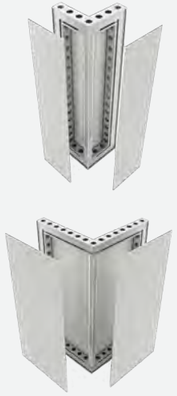
Corners

Corner frames

Never cut corners or accept anything that's second-rate. Creating sharp and perfect looking corners is a piece of cake with our corner frames. Finish with the panels or textiles of your choice.

PERFECT CORNER, PERFECT RESULT

The Perfect corner is a **welded 90° corner frame**. Combine the Perfect corner with any of the b62® frames, curved, straight, doors,... to get the most out of your design. The Perfect corner consists of a slot connector and support profile. As a result, it is possible to add two straight panels with a single small lip. Another option is to **construct a corner with a standard frame**.



PERFECT CORNER 90°

Standard width	248 mm 496 mm	
Standard height	Available in standard heights. Each height is a multiple of 62 mm.	**Art. nr 670 0248 ++++ 30 E** **Art. nr 670 0496 ++++ 30 E**
Infills	Any type of 3mm panel or textile: straight panel, no V-groove needed.

Shelves & brackets

Add function to your walls

The bematrix **shelf brackets** offer you a choice of different types of shelves as well as brochure and book holders that can be integrated in your stand or storage space Another option is to use these shelf brackets to support a table top, for instance the top of your welcome desk.

Our **shelf & tube bracket set** has been specifically designed to hang clothing, for instance to display items on coat hangers.

SHELVES 60°

Mainly used for	Supporting shelves	

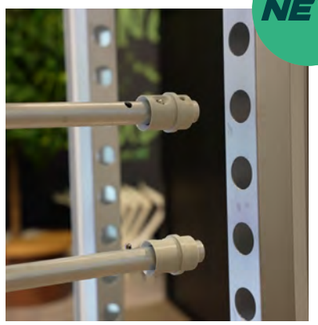
TUBE

Standard width	889 mm	**Art. nr 901 36 0889 TUBE TG**
Mainly used for	Coat hangers	

Frame click-ins

Create even more functionality

The bematrix click-in range is the smartest way to add functionality to your stand, without any hassle. Simply **click, finish and you're done.** With just **one set of click tubes**, you can seamlessly integrate spotlights, mounting hooks, power sockets, TV brackets and portholes. The entire range is based on the principles of super-fast installation, flexibility (slide elements exactly where you need them) and a polished finish every time.



WHY YOU WILL LOVE THIS

- Superfast installation, just CLICK in the frame
- Compatible with 992 mm & 930 mm frames
- Slide components to the ideal position (slide across the tube)
- Achieve an easy, yet high-end finish

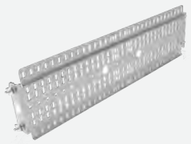
Flatscreen & panel holders

The smart way to add screens

In modern stand building, flatscreens simply are a must. Our **flatscreen support** allows you to integrate your flatscreen in two ways. **Built-in**: where the screen is fully integrated and fully aligned with the frame system's surface. Or **built-on**: where the screen jots out from the panel (no recess required).



FLATSCREEN SUPPORT Frame width 860 mm **Art. nr 901 3706 0860 GALVA**

TIP

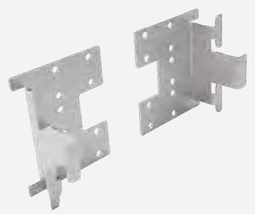
With **beTV**, you no longer need to use brackets. The beTV is fully integrated in the aluminium frame. Scan and explore!

The bracket that holds it all

A **universal steel bracket** is meant for mounting wooden panels onto our frames. Thanks to these brackets, also heavier items can be mounted (such as product samples).

B62 UNIVERSAL BRACKET

Art. nr 901 3703 B62 GALVA

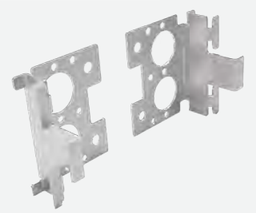


Mount more with ease

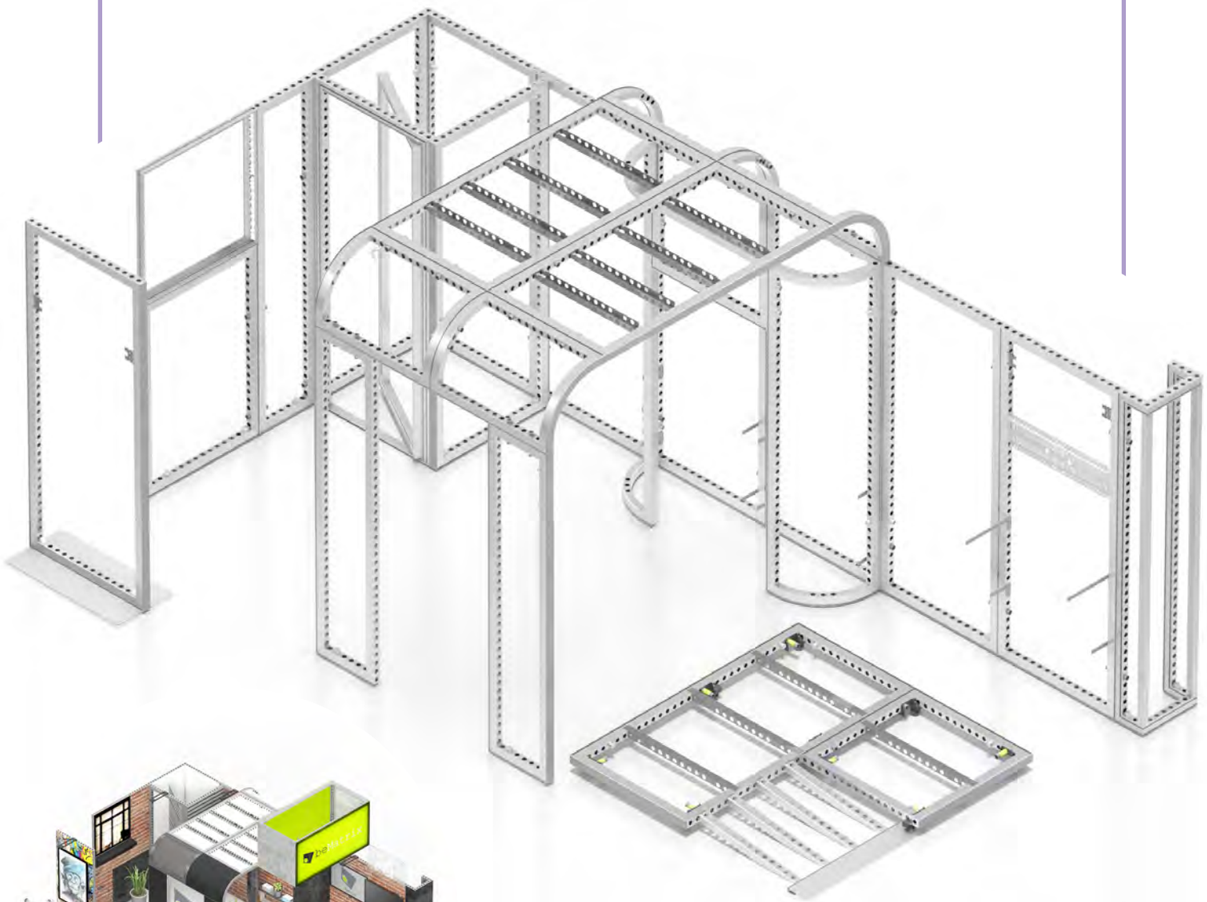
A **flush mount bracket** also is a steel bracket, however, the item is mounted on the outside of your frame. This type of bracket is perfect to combine custom-made items with your bematrix stock, for example for fixing wooden slats to your structure.

B62 FLUSH MOUNT BRACKET

Art. nr 901 3709 B62 GALVA



STEP BY STEP



Finished stand design

- **Add all baseplates.**
- **Add brackets where you want shelves.**
- **Install the flatscreen support.**

Glass frames

Welded glass frame

Glass as an infill is also an option and mounting it becomes quick and easy with the glass frame. Our welded glass frame offers all the advantages of standard straight b62® frames, whilst you can still mount these frames **next to and on top of each other**, using your trusted bematrix connectors.

True to our bematrix DNA, this glass frame is **fully compatible** with your existing stock. The glass is mounted securely with the accompanying glass mounting set.

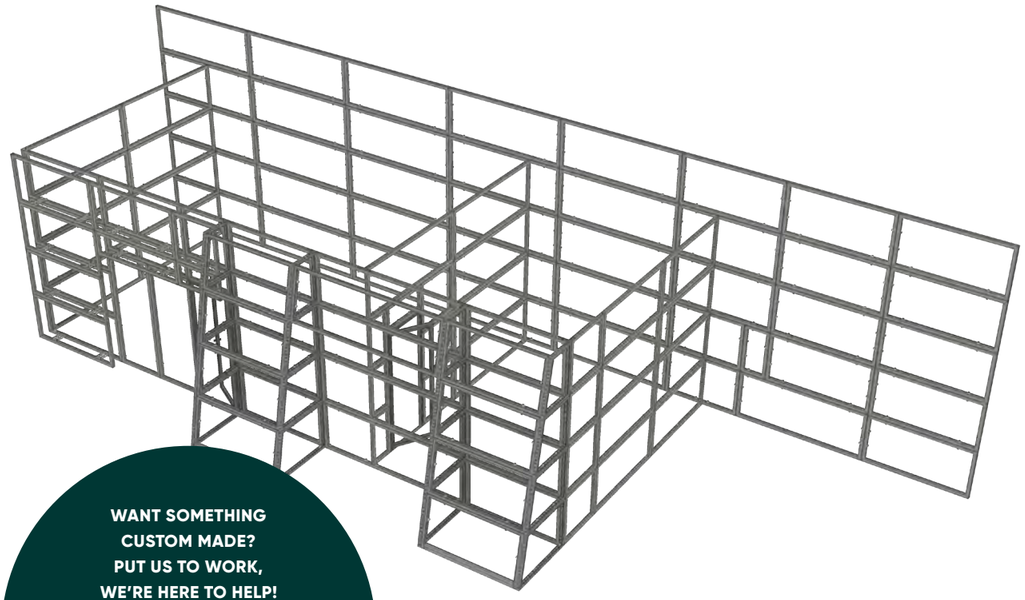
Loose glass profiles

Next to the welded frame, you also have the option to build with loose profiles. Its main advantage: there are **no visible profile edges between the glass sections**.

Important here though is to provide sufficient solidity around the glass, using, for example, a corner profile on top of the glass profiles.

Custom solutions

The bematrix frame system allows for any conceivable shape, outlines and constructions to be built. You cannot find a certain frame in our standard portfolio? Not a problem, we can manufacture a bespoke frame. Such **customised solution** can of course also be used more than once: you can easily integrate them in another stand with a different configuration. No doubt your stand will stand out!



WANT SOMETHING CUSTOM MADE? PUT US TO WORK, WE'RE HERE TO HELP!

Boxscreens

Grab attention from afar

The bematrix **Boxscreens** are solid hanging constructions or can be used as a standalone object. The boxes themselves as well as the textile allow for easy and efficient assembly and ensure your design grabs all the attention. Moreover, it is even possible to add lighting solutions. As with any bematrix solution, you can be sure of a seamless finish, leaving not one profile on show.

iZi furniture

Modular furniture for your stand

In addition to the versatile bematrix frame system and its endless options, we offer you the **iZi-range**: modular furniture such as bars and tables to add that final touch to your stand.

IZI-BAR

The iZi-bar is a **versatile reception desk** that can be used for that particular purpose, but also as a bar or cupboard. It contains two shelves, comes with removable doors with a lock and feet adjustable in height.

On top of that, the iZi-bar is fully customisable using panels or textiles, or you can add a corner, barfly or elevation for a more dynamic look.

IZI-TABLE

The iZi-table is a **ready-made table or column** that can be covered with all kinds of infills to match the set-up or function of your booth. It is available as a wall table or high table.

IZI-TABLET HOLDER

Our fully customisable iZi-tablet holder stands out thanks to its minimalist look and savvy design. **Your tablet will be secured** and cables neatly stored away. You can use it as a freestanding object or secured to the floor.

Kickoff Packs

Did you already come across our Kickoff Packs? These are **ready to use stand building packs**, with which you can start straight away. All packs have been assembled based on our expertise, allowing you to build many different set-ups with just a small stock of material. Ideal for starters at a great price.

Your Kickoff Pack contains b62® frames, all necessary connectors and all kinds of accessories to complete your stand, as well as a technical drawing and a panel plan (in .PDF and .DXF).

GET A 10% DISCOUNT
A 10% discount is calculated in the gross price of the Kickoff Packs. Buying a pack is thus **more profitable** than buying all the pieces seperately.

RENTAL SERVICE CENTRES
Our local service centres provide different **rental solutions** on **short and long term** and support you in urgent matters.

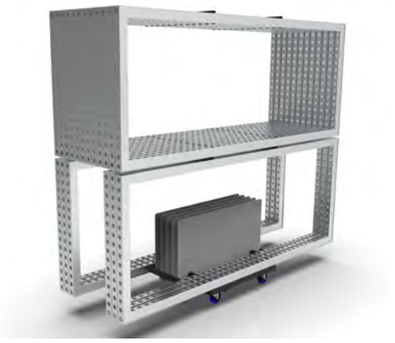
Efficient handling, easy transportation

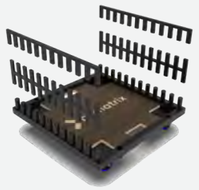
Stack the frames with the Greenie

This product has been created to make stock management and **transport more compact and secure**. Frames can be stacked by one person, corners are protected and all dimensions and shapes are possible to stack with this tiny green element.

Move frames with our trolleys

Our products can be easily transported in a bematrix trolley. Their robust design **protects what's inside**. The smooth-rolling wheels make the transport easy!





COMPACT DOLLY
The Compact Dolly is your go-to solution to transport bematrix frames in a practical, secure, and space-saving way.

COMPACT DOLLY IN DETAIL

The Compact Dolly makes it easy to **transport up to 24 frames,** including door frames, safely and efficiently.
Its reinforced aluminium frame and water-resistant wooden base offer durability. The base can be replaced or branded with your logo.

Its compact size fits smaller trucks, even those with limited space or lift capacity. Four swivel wheels, two with brakes, auto-reset when lifted. Handle slots allow for an optional handle. Empty dollies can be stacked to save space.
Upgrade available with baseplate add-on set.

- Robust design
- High ROI
- Water-resistant, replaceable inner plate
- Smooth rolling
- Easy and safe transport
- 100% compatible
- Stackable when empty

COMPACT DOLLY

Despite its small size, the Compact Dolly can hold 24 frames (including door frames) thanks to a strong aluminium outer structure with steel reinforcements.

YOUR RELIABLE PARTNER

SUPPORT

“Before, during and even after the completion of your project, bematrix is always at your service. Bematrix clients can rely on an extensive and innovative product range, creativity that manifests itself in inventive design, thorough technical and commercial support, flexible delivery times and all the benefits of a strong, cohesive international sales network.”

My bematrix

TRAINING

Find a **complete training calendar** with both online and live training all over the world.

BECAD

Easy design, calculation and automation for all your bematrix projects.

CO_2 CALCULATOR

Calculate the CO_2 footprint of your stand and finish.

BEPARTNER NETWORK

A database of audited partners that can support our customers with **LEDskin®, content, printed panels or textiles.**

KNOWLEDGE BASE

A database full of inspiration, instructions, panel plans, 3D files, brochures and FAQ's.

BEMASTER NETWORK

Access **highly skilled builders** all over the world through the beMasters network.

ORDER SUPPORT

Manage both your purchase and rental quotes in **one dedicated area.**

Global Rental Network

The Global Rental Network is a **network of service centres** holding a large range of bematrix products, **spread all over Europe, the UK and the USA.** Thanks to this network, you do not have to ship your bematrix stock between locations, but you can use the large stock available locally. Moreover, the availability of frames is almost unlimited, even allowing you to build exceptionally large projects.

LOCATIONS

EU locations + USA locations:
Atlanta & Las Vegas.

We offer two different renting options at a favourable price and, maybe even more interesting, the possibility to spread the cost of your bematrix project.

Short-term renting has a typical run time of 1 day to 6 months.

Long-term renting has a minimal run time of 6 months with a minimum of 50 frames. Both rental plans can also be combined, to meet your specific needs.
